

Increase the performance of your central heating system with a **Magmaster** service.

The Magmaster uses two powerful magnets to filter out most of the loose debris circulating around your central heating system.

Key benefits:

- More efficient central heating system
- Reduced energy bills up to 25%
- Reduced risk of early boiler failure
- Radiator heat is increased
- Boiler noise is reduced

Prices start from
£250+VAT

quote based on survey and
number of radiators.

“ Testimonial

I was experiencing heating problems at home with some radiators not warming up, I didn't really know what was wrong, so I called Caecillian who came out to visit me. The engineer was most helpful and suggested that my heating system would benefit from a Power Flush. A few days later they returned and flushed the system, the process was quick, they were very clean and tidy and I was amazed with the amount of muck that came out of it. The radiators are now working much better. I would highly recommend Caecillian for their friendly advice and their professionalism. ”
